Seabrook International hires a President and Chief Operating Officer

Seabrook, New Hampshire USA – March 13, 2006 - Seabrook International is pleased to announce that Paul Barck has joined Seabrook International as President and Chief Operating Officer. This new position has been created to strengthen the organization as we continue to build the business in response to a rapidly growing market. Reporting to the Chief Executive Officer, Paul will be responsible for routine business operations including Manufacturing, Engineering and Quality Systems Engineering.

Paul comes to Seabrook with over twenty four years of experience in various capacities leading to his last assignment as President of a twenty five million dollar medical device manufacturing company. Paul started his professional career as a machinist and has since complimented those skills with formal engineering and business management training. Paul's strong manufacturing and engineering background in FDA regulated and cGMP environments makes him an excellent fit for our business.
